- At Digital Bhem, the members are committed to providing innovative digital solutions that help the clients achieve their business goals. The experts specializes in software development, mobile app development, website design and hosting services.

Projects

Creating Online Banking System | *HTML,CSS,JAVA SCRIPT*

- Online banking is a system that allows customers of a financial institution to conduct financial transactions through a website operated by the institution. This can include viewing account balances, transferring funds between accounts, paying bills, and making online purchases.

Eco-friendly E-Commerce Platform | *HTML,CSS,JAVA SCRIPT,PHP,MYSQL*

- The aim is to create an eco-friendly e-commerce platform for conscious consumers. Tailored for user-friendliness, it employs HTML, CSS, JavaScript for frontend and PHP, MySQL for backend. With a dynamic product showcase, secure transactions, and responsive design, this project seamlessly blends technology with sustainability, reshaping ecommerce for a greener future.

Achievements

Solved more than **300** problems across platforms.

Achieved Mepro Level 10 conducted by Pearson Mepro.(Link)
